SUMMARY

Aspiring Data Scientist with a solid academic background in **Data Science, Machine Learning, Statistics, and Artificial Intelligence**. Skilled in **Python, SQL, Pandas, NumPy, Scikit-learn**, and **Power BI** for **data extraction, data analysis, data visualization, and predictive modeling**. Proven ability to derive meaningful insights from **structured data and unstructured data** through academic projects and real-world datasets. Strong understanding of **data preprocessing, feature engineering, model evaluation, and business analytics**. Seeking an **entry-level Data Scientist** position to leverage **analytical skills** and contribute to data-driven business solutions.

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **Data Science & Analytics:** Data Cleaning, Exploratory Data Analysis, Predictive Modelling
- **Machine Learning:** Regression, Classification, Supervised Learning, Unsupervised Learning, Model Evaluation
- **Data Visualization:** Power BI, Tableau, Matplotlib, Seaborn
- **Databases:** MySQL, PostgreSQL
- **Libraries:** Pandas, NumPy, Scikit-learn
- **Tools:** Git, Jupyter Notebook, Streamlit,

WORK EXPERIENCE

Data Science & Machine Learning Intern | Dot Com Infoway | Madurai, Tamil Nadu

May 2026 – Jun 2026

- Developed a **Customer Churn Prediction** model using **Python** and **Scikit-learn** to identify customers likely to leave, enabling **data-driven** customer retention strategies.
- Built an **Employee Salary Prediction** model using **Machine Learning regression techniques** to estimate salaries based on employee experience, skills, education, and other job-related factors.
- Performed **Data Cleaning, Data Preprocessing, Feature Engineering**, and **Exploratory Data Analysis (EDA)** on large datasets to improve **data quality** and **model performance**.
- Applied **Classification and Regression Algorithms**, evaluated model performance using appropriate **performance metrics**, and optimized models to improve **prediction accuracy**.
- Created **Data Visualizations** and analytical reports using **Python, Pandas, NumPy, Matplotlib**, and **Seaborn** to communicate insights and support **business decision-making**.

EDUCATION

Bachelor of Science in Computer Science | GPA: 6.5/10 | Jamal Mohamed College | Tiruchirappalli, Tamil Nadu

2024 – 2027

PROJECTS [View all](#)

Employee Salary Prediction | Python, Scikit-learn, Streamlit [Live Demo](#)

- Developed and deployed an **Employee Salary Prediction** web application using **Python, Machine Learning, Scikit-learn**, and **Streamlit** to estimate salaries based on employee attributes and job-related factors.
- Performed **Data Cleaning, Data Preprocessing, Feature Engineering**, and **Exploratory Data Analysis (EDA)** to improve dataset quality and enhance model performance.
- Implemented and evaluated **Regression Models** using appropriate **Machine Learning Algorithms** and performance metrics to achieve accurate salary predictions. Built an interactive **Streamlit Dashboard with data visualization and real-time prediction capabilities**, enabling users to generate insights and support **data-driven decision-making**.
